ear Paul, Glad to get your 5/9. ...I've read a review of the mind-control book, a condensation and I have ave the book. ...Did not catch the Newman NBC CIA expose but did see Stockwell on 60 Minutes. Brave an! Now we'll see if they charge him, a la Snepp. And if they do if they also charge Angleton at al. anna bet? ...I've heard that 60 Minutes is working on a real screwy one, that Cooper, the one who umped into subfreezing cold from an airplane with a big snatch of money, was the King killer. Being orked on or was worked on out there by a guy named Summers ...Litigation taking more and more time ut I hope that in the near future we will have worked our way most of the way out of the older ases, except for any remands. ...Good day here. Mowed on riding mower for a while, brief rest and hen with hand mower 2-30 minutes without any reaction such as last summer. After I write this I'll o a little more mowing while rifling, then take another break. Report for rain and I want to beat it because early next week two trips to DC on two FOIA cases. ... Please watch for any Lane publicity on House assassins. No time to tell you of our adventures there Monday and Tuesday, with Jim orcing them to let him represent Ray's sister, Carol Pepper, and representing John Ray at the same ime. (Committee claimed conflict of interest, as it had with Lane, who chickened and went off to romote himself.) Rev. Lawson, from an IA church, refused to testify yesterday unless they opened he session to the public. No local coverage. Correct position Jim could not force to an issue and ecision with John and Carol because each is too vulnerable. I do not think that the committee will are cite a black preacher for contempt on such an issue. This makes it even more important because f they do not they can't very well cite any others. If their secrecy is ever broken they are done. For their window-dressing hearings of the fall they'll be more careful.) ...Same if you see any tories on Gracie Stephens. Lane kidnapped her, which will make the Penn. authorities happy. She an't help and they are rid of her and the problem she made for them. ... I really feel good about ow much more I can do now. Several years ago the county dumped an enormous truckload of earth and ocks near the dam, to repair it, then did not make the repair. I've been moving it gradually, to he back of the house, to fill in washes. And I've used the stones to build up the low side of the ane. Gradually I've moved most of it. So I take half a load. And I do not use the trailer and the iding mower, which would be easy. All by hand and foot, Thanks for the enclosures. Best, HW 5/12/78
